Builder Dashboard

Create sites and manage everything centrally.
Set up construction sites, assign agencies, and track overall progress in real time.

Create teams and invite members easily. Builder Admin sets up the organization, creates sites, and invites project managers, site engineers, and agency teams to collaborate.

”

Project Manager Dashboard

Plan work and keep projects on schedule.
Assign tasks, coordinate teams, and ensure work is completed on time across all sites.

Agency User

Agency Admin Dashboard

Manage teams and oversee assigned work.

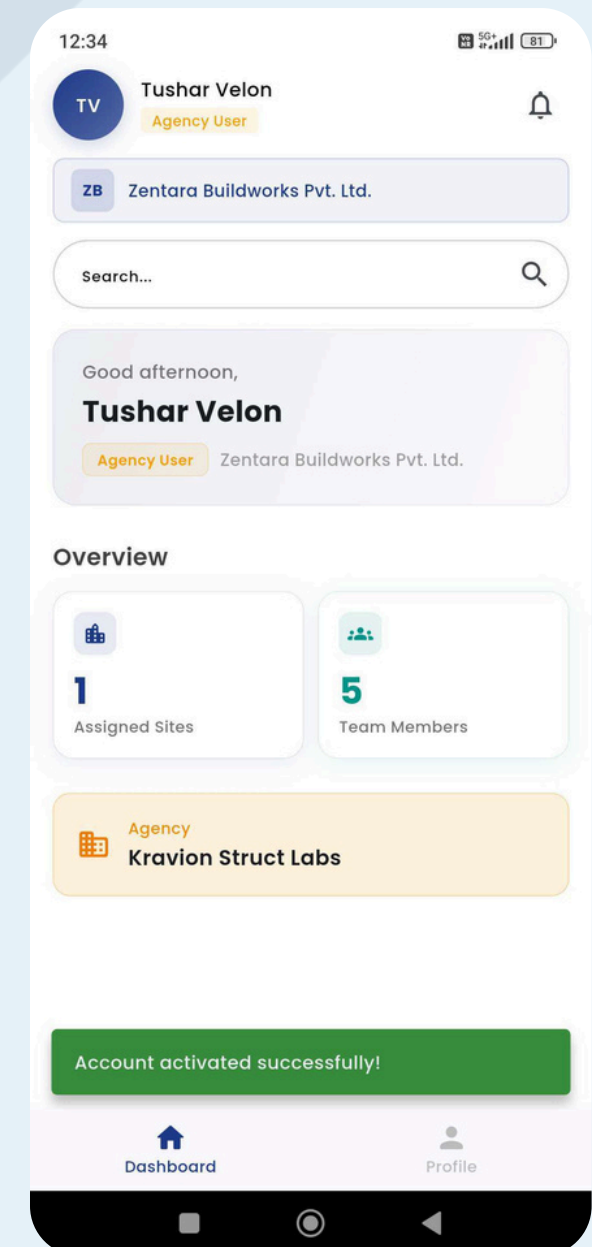

Assign tasks to workers, track performance, and ensure work is completed efficiently

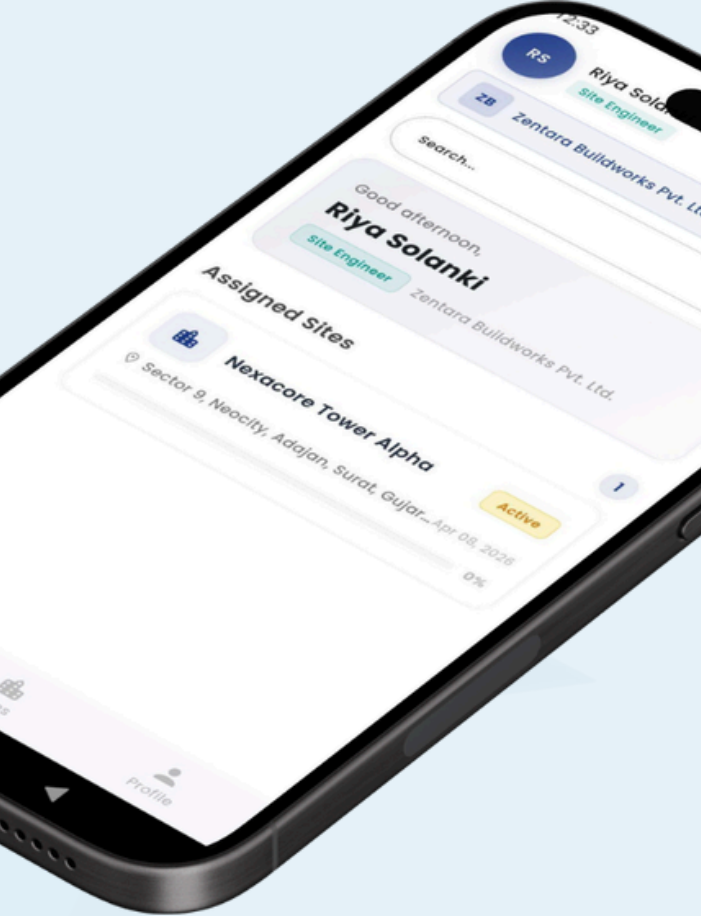

View tasks, update daily work, and report progress instantly

Agency User Dashboard

Update daily work and task progress. View assigned tasks, log daily work, and keep the team updated in real time.

Site Engineer Dashboard

Manage site work from the field. Access site details, update progress, and keep everyone informed in real time.

Assign agencies to site tasks. Select work types and assign responsibilities clearly to ensure smooth execution.
